SVS105MM 5" TFT LED Rear View Mirror

Product Information

Reversing can be a difficult manoeuvre for motorists to perform. The rear vision is often limited by the vehicle structure and other visual obstructions that often make the task all that more difficult. Typical built in OE rear view systems can be a costly option or addition, but you no longer need to worry.

Introducing the 5" SVS Rear View Mirror Monitor. (Universal bracket available for complete rear view replacement.)

This slim line unit can automatically switch to the rear view system when the vehicle is reversing, ensuring safe driving at all times. It also allows for VCD/DVD/TV/GPS playback via the video input connection.

Featuring a superb TFT-LCD display and dedicated touch screen buttons, this unit is the perfect in-car accessory for your reversing system. The SVS105MM has been designed with special anti-glaring glass for a visible, clear picture, safe from any distractions the sun may cause.

Special Bracket for Installation
