

## SVSSDR Sports Digital Camera

Action camera ♦ Mini DV ♦ Full 1080P HD ♦ Waterproof to 10m

### Product Information

Designed for the outdoor enthusiast and professional alike who wants to capture and share high definition videos of their most extreme sporting moments.

#### Full HD Video - 1080P

The Extreme Sports Digital Camera captures FULL HD 1080p (1920x1080) video and brilliant sound. With amazing clarity and stability this camera records your sports' most exciting moments in high quality HD video and high resolution 5 megapixel still photos. Even better, it utilises a 140 degree wide-angle lens to capture more of the action. Once you've captured your extreme moments, you can view and hear all the action on the built in 1.5" TFT screen and speaker or play through your computer or TV.

#### Recording Features

The Sports Digital Camera features automatic upright screen orientation for easy viewing, allowing the camera to be mounted upside down or sideways, which is useful for recording your exhilarating extreme sports moments when mounting options are limited! The built-in motion sensor gives you the ability to capture more of the action by recording only when the Sports Digital Camera detects movement.

#### Waterproof to 10m

The body is tough and water proof to take all of your outdoor abuse. Use your camera in the snow, sleet, mud, and rain and be assured that you will still capture that epic adventure without fail.

**Accessories Inc.:** TV cable, USB Cable, HDMI cable, Suction Cup bracket, battery, charger, User manual, car charger, multi-use bracket, velcro strap, goggle velcro strap, microphone
