

**Safety Through Vision**

## Rear View Mirror Monitors

**100**  
*Serves*

**SVS104MM**

### Product Information

Reversing can be a difficult manoeuvre for motorists to perform. The rear vision is often limited by the vehicle structure and other visual obstructions that often make the task all that more difficult. Typical built in OE rear view systems can be a costly option or addition, but you no longer need to worry.

Introducing the SVS Rear View Mirror Monitors. (Universal bracket available for complete rear view replacement.) These slim line units can automatically switch to the rear view system when the vehicle is reversing, ensuring safe driving at all times.

Featuring a superb TFT-LCD display, these units are the perfect in-car accessory for your reversing system. Both versions have been designed with special anti-glaring glass for a visible, clear picture, safe from any distractions the sun may cause.

Special Bracket for Installation

**SVS105MM**
